

EDITORIAL

Leaps and Bounds...

The journey of the journal has been tumultuous and at the same time insightful and pleasant. There has been encouraging feedback from our peers praising the journal for its quality and subject material that they found clinically pertinent and educative. The journal is primarily focused on advancements in all fields of dentistry, giving prime importance to research. The journal is the official journal of H.P. University and each paper is awarded 15 points according to DCI guidelines. Moreover, the journal is indexed at several national and international agencies and in the process of being indexed in PUBMED. Furthermore, the journal has started the online submission system of papers using the Open Journal Systems (OJS), through which the authors can track their papers and also get regular updates on their submitted papers and release of new issues. I sincerely extend my heartfelt thanks to the patron, executive, assistant and technical editors and members of the Editorial committee and advisory board, for helping me out in the smooth functioning of this journal. We welcome constructive suggestions and sincere feedback from the dental fraternity that will help improve, enhance and enrich the journal, Dental Journal of Advance Studies.
